

## HOW WILL AGENDA 21 BE IMPLEMENTED??

Clinton created an environmental council, ICLEI, for this task. The ICLEI divided the US into 10 regions, each with advisory council made up of Governors of selected (by the President) states. They oversee the individual states, each of which have Regional Planning Councils (Florida has 11; the one in this area is Pasco Regional Council). Usually each city has a representative on the local Council. These councils are encouraged to create Public/Private Partnerships to do projects in accordance with Federal Government desires, financed by various Federal Government agencies. The focusing on ecological and aesthetic consequences, then making or recommending laws or regulations for present and future use in accordance with "SOCIAL JUSTICE." While the preservation of land and water use sounds great, the true result of Agenda 21 is to place the ultimate power to make these decisions in the hands of the United Nations and that the decisions be made based mainly on environmental impact, focusing on three components;

GLOBAL LAND USE, GLOBAL EDUCATION, and GLOBAL POPULATION CONTROL AND REDUCTION.

## How Will Agenda 21 Affect ME???

### LOSS OF FREEDOM

Loss of Freedom to determine the use and enjoyment of land you own.

Loss of Freedom of Travel as there will be restrictions on where roads can be built and who can use them and what vehicles can travel on them.

Loss of Family Size as like China there will be population control so as not to overwhelm the environment.

Loss of Freedom of What You Eat. Michelle Obama and the Government already is controlling what can be served in the schools, what you can give your kids to take to school to eat, what restaurants may serve, and what can be the ingredients in many foods.

Loss of Where You May Live. One objective of Agenda 21 is to restrict people to living in cities, preferably in high-rise apartments and where the Government owns the apartments and determines who lives there.

Loss of Job Choice. By restricting where you live and can travel the Government restricts the type of jobs you afford to apply for.

Loss of Personal Wealth. By restricting travel, where you can live, and the type of jobs this restricts your income, a form of Redistribution of wealth.

Loss of Freedom of Religion. The Government will control the use of land and thus control where Church's can be built, and there may not be any Churches of a denomination you prefer in your area.

Loss of Personal Freedoms. As the Government will control the environment they can restrict your speech so you don't intrude on someone else's space, restrict or ban smoking, restrict use of home computers, etc. They already have restricted what type of light bulbs you can buy.

What Can YOU DO???

We've got something here that no one else has got and it's well worth fighting for.—Bob Boulwere, Prisoner of War

"It's my Flag, My country."
